

To Whom It May Concern,

You may have received from PowerCloud Systems, certain products that contained – in part – some free software (software licensed in a way that ensures your freedom to run, copy, distribute, study, change and improve the software). Such products include the CAP 324-NA, CAP324-EU, WAP 334-NC, CR5000, CR3000.

As part of these products, PowerCloud Systems or its distributors may have distributed to you hardware and/or software, or made available electronic downloads, that uses software from OpenWrt (<http://www.openwrt.org>), a third party organization without any affiliation to PowerCloud System, on the same media as PowerCloud system proprietary software and/or hardware. OpenWrt may also include free (i.e., freedom-respecting – see <http://www.gnu.org/philosophy/free-sw.html> for more details) software programs developed by the Free Software Foundation, a separate not-for-profit organization without any affiliation to PowerCloud System. If we distributed any of these free software programs to you, we want you to know that you were granted a license to that software under the terms of either the GNU General Public License or GNU Lesser General Public License (“Licenses”; copies of which are available from <http://www.gnu.org/licenses/licenses.html>). The Licenses allow you to freely copy, modify and redistribute that software and no other statement or documentation from us, including our End User License Agreement, places any additional restrictions on what you may do with that software.

Further, for at least three (3) years from the date of distribution of the applicable product or software, we will give to anyone who contacts us at the contact information provided below, for a charge of no more than our cost of physically performing source code distribution, a complete machine – readable copy of the complete corresponding source code for the version of the Programs that we distributed to you if we are in possession of such.

To obtain the source code for the latest version of the free software programs in connection with the above current products please contact:
